Effect of urbanistic action on social perspective

Capture the user's perception of a city exploiting its digital footprints and study how the city zones evolved looking at the geo-tagged contents

Report and presentation for the administration to show the effectiveness of the adopted territorial policies and to suggest future improvements and investments

System Requirement Review (SRR)

- **Data Collection**
  - **Estimated time** : 3 weeks
  - **Tools** : python, Flickr API, Instragram API, MongoDB, Dropbox
  - **Requirements** :
    - **DB organization**
    - Data downloading
    - Image downloading
    - Insert data into DB
    - Insert images into Cloud
    - Pulizia dati ridondanti, incompleti o errati

DB organization

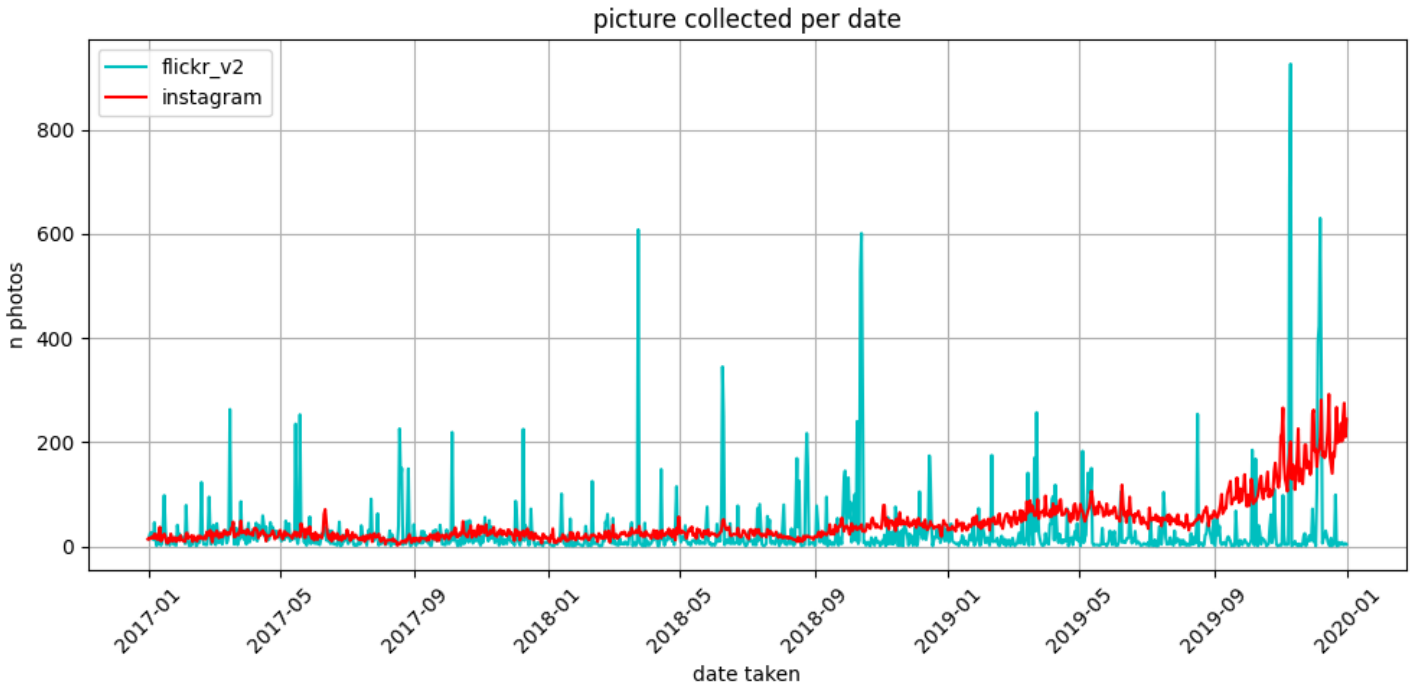
Final data distributions



Number of images collected:

- Flickr : 28.661
- Instagram : 48.903

Period:

from Jen.2017 to Dec. 2019

System Requirement Review (SRR)

- **Clustering**
  - **Estimated time** : 7 weeks
  - **Tools** : Python, QGIS, Kmeans algorithm
  - **Requirements** :
    - **Study of different methods** (Kmeans, DBscan, Voronoi regions, etc.)
    - **Definition of the best method to be adopted** (Kmeans: faster, only one parameter to set, physically meaningful)
    - **Normalization of the datasets for the clustering phase**
    - Fine parameters' tuning (minimization of the inertia)
    - Data extraction and processing with the chosen method
    - Study and conclusive analysis of the results

Normalization of the datasets

System Requirement Review (SRR)

- **Image processing**
  - **Estimated time** : 8 weeks
  - **Tools** : Python, Transfer learning
  - **Requirements** :
    - Study of possible deep learning pre-trained models
    - Definition of the best model to be adopted
    - Network training
    - Test results with evaluation of parameters such as accuracy and precision
    - Complete image processing of the images into DB
    - Cleaning of non-useful images
    - Study and analysis of results
